

## Fluid Floor for Silo Systems

Constant and complete drainage

---

---

In addition to fluidization, STAG uses Fluid Floors for silos with multiple outlets.

**Function**

The entire silo floor is equipped with a fluid cloth and enables the bulk material to be stored to flow off constantly and completely.

---

**Experience**

- More than 10 realized silo systems
- Realized conveying distances up to 2300 m
- Realized conveying capacities up to 300 t/h

**USPs**

- Low maintenance
- Functionally reliable
- Bulk material-specific discharge variants to support pneumatic conveying
- STAG Service Support

**Industries**

- Waste to Energy
  - Power plants
  - Steel mills
  - Building materials industry
  - Paper industry
  - and many more
-
