

Big bag Uptake cross

Reliable filling

The Big Bag Uptake Cross is an indispensable component for the efficient filling of big bags. Its robust design ensures that the bags are held securely and stably during the filling process. With precise alignment and easy handling, the Big Bag Uptake Cross optimizes the filling process, enables even distribution of the material and contributes to smooth logistics. Ideal for applications where reliable big bag filling is crucial.

Function

The spring-loaded carabiners make it easier to attach and detach the big bag. The bag clamp ensures that the dust load can be reduced to a minimum. A nozzle is also provided for any extraction.

Experience

- Over 50 in use worldwide
- various music pockets
- Big bag filling stations

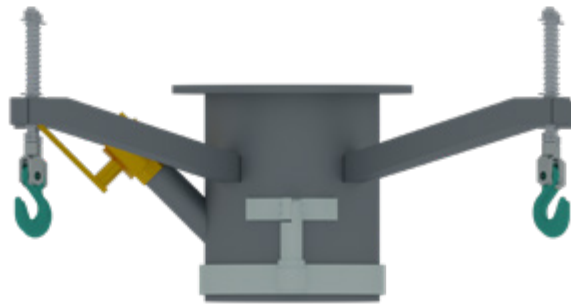

USPs

- Expandable with inflation clamp
- Different dimensions
- Spring-loaded big bag holder

Industries

- Waste to Energy
 - Power plants
 - Steel mills
 - Building materials industry
 - Paper industry
 - and many more
